PROFILE

Junior QA Tester with hands-on experience from a QA bootcamp and independent projects, including manual QA, exploratory testing, UI verification, API testing, SQL data validation and AI behaviour checking. Strong attention to detail, clear communication and a user-focused mindset, with experience working across digital platforms and supporting technical teams to improve clarity, structure and quality.

CORE QA SKILLS

- Manual testing: functional, regression, exploratory
- Test case creation and structured test documentation
- Defect logging with clear reproduction steps
- API testing using Postman
- SQL for data validation
- UI testing and DOM behaviour verification
- Understanding of SDLC and QA workflows
- Attention to detail, communication and documentation
- Version control with Git & GitHub

RELEVANT EXPERIENCE

Postgraduate Research Administrator – University of Bristol (2024–Present)

- Validated SharePoint digital content and workflows for structure, accuracy and clarity.
- Identified issues such as broken links, inconsistent layouts and unclear user journeys.

- Collaborated with technical teams to resolve UI/content problems and improve user flows.

- Created clear documentation, user guides and improved process structure.

Research Coordinator – Bristol Cats Study (2022–2024)

- Updated and validated participant-facing digital content.

- Identified usability issues and recommended improvements.

- Used data and insight to validate changes and detect issues in workflow.

Partnerships Coordinator – University of Bristol (2021–2022)

- Built and maintained SharePoint portals with structured content.

- Performed content audits and tested navigation flows for clarity and usability.

- Improved user experience through structured updates and consistent styling.

PROJECTS (Bootcamp & Independent)

- React Bank App – tested field validation, input handling, error messages and user flows.

- DOM Interaction Testing – validated interactive behaviours, state changes and UI consistency.

- SQL Validation Tasks – checked data accuracy using SELECT queries and joins.

- API Testing Portfolio – created and validated API requests, responses and error handling.

- AI Behaviour Testing – checked outputs for accuracy, safety and clarity.

EDUCATION & TRAINING

- Level 3 Software Development & QA Bootcamp – Iungo Solutions (2024)

- The Complete SQL Bootcamp – Udemy (2024)

- MSc Criminology & Criminal Psychology – University of Portsmouth

- BSc Psychology – UWE Bristol
